

TP-Link Business Solutions

Hardware and software solutions
for future-proof network and
video surveillance management

TP-Link

TP-Link Systems Inc. is a California-based company with nearly **30 years of experience** in the **enterprise networking** industry. We distinguish ourselves from other providers through three significant advantages:

01 Vertical integration:

We **produce almost all of our components ourselves**. This ensures cost efficiency and high product availability for you.

02 Quality and innovation:

We emphasize our focus on innovation and technology development through our **seven R&D centers worldwide**.

03 Regional presence:

We support you directly from Switzerland with highly competent **sales and pre-sales teams** available for all your inquiries, **in all Swiss languages**.

Industry-leading Partner Program

The **TP-Link SolutionX Partner Program** offers comprehensive advantages for all companies that resell network and video surveillance solutions.

To support the success of our partners, we offer unrivaled benefits, including:

- ✓ **Local sales and pre-sales contacts**
- ✓ **Project pricing with up to 50% discount and project exclusivity**
- ✓ **Annual kickbacks up to 13% of your TP-Link product purchases**
- ✓ **High-quality and free of charge after-sales support** in DE, FR, IT and EN
- ✓ **Integrated 5-year product warranty** on most products
- ✓ **Regular product trainings, certifications and webinars**

Omada by TP-Link

Omada by TP-Link offers an innovative, **centralized SDN platform** that allows users to easily and intuitively manage their network environment. **Recognized in the Gartner® Magic Quadrant™** for Enterprise Wired and Wireless LAN Infrastructure for the last six years*, TP-Link's **comprehensive portfolio** includes:

- ✓ **Controllers:** Developed for easy management, administration and maintenance with an optimized user experience. Available as **hardware, cloud licenses or free software**.
- ✓ **Access Points:** **Wi-Fi 7, 6 and 5** technology in a compact package suitable for any scenario.
- ✓ **Switches:** Wide range of ports and features, **up to 25G speeds, L3 and PoE++**, supported by an extensive set of **software features**.
- ✓ **Routers:** Entry-level and premium options **up to 10G** that ensure stable and optimized operation.

VIGI by TP-Link

VIGI by TP-Link is the smart and **intuitive video surveillance solution** designed for monitoring business environments and **automating enterprise security management**.

VIGI cameras can be managed via **cloud, software, and hardware NVRs**, and offer features that make monitoring your business easier.

Our **cameras**, which are made in metal or plastic casing, are available in a **variety of formats**: bullet, turret, dome, fisheye and pan-tilt.

2025 will also be the launch year of **Omada Central**, a solution that allows you to manage **network and video surveillance solutions in a single pane of glass**.
