

Delivery You Can Put Your Name On

Penetration Testing Partnership for Security Firms and Consultancies

2,000+ ASSESSMENTS

One team. One Network

**Every engagement led by our senior team,
backed by vetted specialists**

**EU-based: Cluj-Napoca, Romania and Berlin,
Germany**

**NATO clearance held by leadership, strict data
handling by default**

**NDA-first process before any technical detail is
exchanged**

You always know exactly who is touching your client's systems and data.

Meet the Founding Pentesters

Ovidiu Valea
CEO, TECHNICAL LEAD

Costica Luchian
CHIEF TECHNOLOGY OFFICER

David Timofte
CYBER OPERATIONS LEAD

The people in the scoping call are the people in the engagement. Published CVEs. 2,000+ assessments

A report your client's board can actually read.

- Management summary written for the executive who approved the spend
- Technical findings for the engineering team, cleanly separated
- How we got in, how we moved, what to fix, in that order, no filler
- Draft on high/critical findings before final delivery, no surprises
- Technical account management handled by us

Delivered under your brand and templates, or ours.

The delivery lead attends the client readout. **Every time.**

The debrief is where the next phase gets sold. We treat it that way.

White-label or referral. You choose per engagement.

White-Label

Your brand on everything. You own the client and set the price, we quote you a net rate. We deliver invisibly in your templates.

Best when testing is part of your core offer.

Referral

You introduce, we take it from there. You stay the trusted point of contact, we handle the technical relationship. Finder's fee per closed engagement.

Best when testing sits outside your focus.

No exclusivity, no lock-in, no minimum volume. Decide deal by deal.

CREST Member Company | NATO Clearance

Clear ownership at every step.

48 hours from agreement to engagement start.

Proof.

FINANCIAL SECTOR / EMEA

Financial Authority

Full infrastructure assessment led by Ovidiu and Costi. Critical Active Directory and network segregation flaws found, fixed, and staff trained on secure implementation.

BANKING, PCI DSS

Middle Eastern Bank

Ovidiu and David delivered testing across web, mobile, and infrastructure (internal, external, and cloud). Passed PCI DSS audit with full documentation.

DIGITAL FORENSICS / CRYPTO FRAUD

Unmasking a 120 BTC Telegram Fraudster

Traced blockchain transactions and Telegram communications to identify the threat actor behind a large-scale cryptocurrency fraud scheme, supporting law-enforcement follow-up.

INDUSTRIAL MANUFACTURING

360° Red Team Assessment

Full-scope adversary simulation across IT, OT, and physical perimeter for a global manufacturer, validating detection and response readiness end to end.

Full service range.

Penetration Testing

External, Internal, Web, Mobile, API, Wireless

Cloud & Infrastructure

Azure, AWS, Active Directory, Containers, DevSecOps

Specialized

ICS/SCADA, IoT, Physical, Thick Client, AI/LLM Testing

Red Team

APT Simulation, Assumed Breach, Social Engineering

Compliance

PCI DSS, ISO 27001 Gap Analysis, NIS2, DORA

Response

Incident Response, Digital Forensics

Start small. Prove it.

1

Discovery call

30 minutes on where testing fits your client base

2

Pilot engagement

One project, your preferred model, our team

3

Scale

Expand only when the first delivery earns it
